

**Report on asset quality  
as of September 30, 2019**  
Caisse Française de Financement Local  
(Instruction n° 2011-I-07 of June 15, 2011)

**C.I.B 14 388**

The report on asset quality, compliant with Instruction No. 2011-I-07 of, June 15, 2011, aims at presenting all of the assets comprising the cover pool of Caisse Française de Financement Local and the management framework of its interest rate and liquidity risks.

As of September 30, 2019, Caisse Française de Financement Local's cover pool is made of EUR 47.7 billion of loans, EUR 5.5 billion of bonds and EUR 2.9 billion of replacement assets, that correspond to the following exposures:

EUR thousands, as of 09/30/2019	Total cover pool	Assets removed from the cover pool	Total Outstanding
Exposures on public sector	53,261,962	628	53,262,590
Asset-backed securities	-	-	-
Replacement assets	2,859,054	-	2,859,054
<b>TOTAL</b>	<b>56,121,016</b>	<b>628</b>	<b>56,121,644</b>

As a *société de crédit foncier*, Caisse Française de Financement Local can access the refinancing possibilities offered by the Banque de France to banks. Within the framework of the management of its cover pool and its cash, Caisse Française de Financement Local can thus remove some assets from its cover pool and pledge them to the central bank to obtain funding from tenders organized by the Banque de France. Caisse Française de Financement Local did not use this possibility over the course of the last three years (with the exception of operational access tests, regularly implemented) and no asset has been pledged to the Banque de France as of September 30, 2019.

Some assets held by Caisse Française de Financement Local may also be removed from the cover pool if they become non-eligible, before being sold or matured.

The cover pool does not contain any asset-backed securities. The current and future *obligations foncières* issued by Caisse Française de Financement Local are in line with the eligibility criteria required by the European Central Bank for refinancing and are also compliant with regulations rules CRR / CRD IV.

## 1. MORTGAGE LOANS

Caisse Française de Financement Local has no mortgage loans in its cover pool.

## 2. EXPOSURES ON PUBLIC SECTOR

### 2.1 BREAKDOWN BY COUNTERPARTY

Direct exposures refer to exposures on public sector entities and indirect exposures to exposures fully guaranteed by public sector entities. Exposures in a foreign currency are converted into euro using the exchange rate of the hedging swap.

Loans and bonds are presented after specific impairments and are off premium / discount.

## 5. MANAGEMENT OF THE INTEREST RATE RISK

To limit interest rate risk impact, this risk is hedged in two stages by Caisse Française de Financement Local:

- In the first stage, all the assets and the liabilities benefiting from the privilege which do not naturally have a floating rate are hedged against Euribor until maturity as soon as they are recorded on the balance sheet. In practice, acquisitions of loan portfolios (in which the unit amount is generally small) are usually macro-hedged. Loans granted individually or bond issues can be micro- or macro-hedged. Hedging of assets and liabilities is more often obtained in using new interest rate swaps, but the same effect can also be obtained whenever possible by the cancelation of swaps of opposite direction.
- In the second stage, Euribor lending and borrowing flows (naturally or after hedges) are swapped against Eonia in order to eliminate the basis risk generated by differences in the tenor (Euribor 1, 3, 6 or 12 months) and the fixing risk due to refixing dates of reference indices that differ for the assets and the liabilities. The residual risk is managed using macro-hedges with a management horizon of one week.

These hedges can be entered into either directly on the market by Caisse Française de Financement Local, or through SFIL, which in turn hedges its resulting position in the market.

Non-privileged debt is not concerned by these hedging operations. In fact, debt contracted by Caisse Française de Financement Local with its shareholder to finance over-collateralization is borrowed either directly with a Eonia index and does not need to be swapped, or with a Euribor index and thus finances assets also indexed on Euribor. Short-term debt owed the Banque de France with a fixed rate (if any) is not hedged, but finances fixed rate assets.

The sensitivity of residual positions in fixed rates and variable rates fixed for a determined period of time that remain after the two levels of hedging is monitored on a monthly basis. Limits provide a framework for this sensitivity and are designed to reduce the impact on the value of balance sheet items in the event of a shift in the yield curve or a move in sloping/rotation. They are calibrated so as not to lose more than EUR 80 million with a quantile of 99% calculated based on ten years historical data.

A set of three limits makes it possible to have a grasp of the slope risk, as well as the directional risk. These limits control the sensitivity of the fixed rate risk and together guarantee the respect of the maximum loss mentioned above.

The measurement of sensitivity for shifts in rates of 100 basis points at the end of each quarter is presented below:

## 6. MANAGEMENT OF THE LIQUIDITY RISK

Caisse Française de Financement Local's management makes it possible to provide a structural coverage of its liquidity needs by assets eligible for refinancing by the Banque de France, until the full amortization of the privileged liabilities.

Moreover, Caisse Française de Financement Local ensures that at any time, its cash needs over a period of 180 days are covered by replacement assets and assets eligible for credit operations with the Banque de France. Cash needs are defined as repayments of *obligations foncières* and registered covered bonds (RCB), of debts that do not benefit from the legal privilege and forecasts of repayment of the cash collateral received, after deduction of amortization cash flows from assets.

As of September 30, 2019, the liquidity situation showed a surplus over the next 180 days. The movements observed correspond to cash flows from amortization of *obligations foncières*, cash collateral, non privileged liabilities and assets.
